

Industrial CPD Seminar

建築信息模擬-整合樓宇及設施管理系統 Integrated Building and Facility Management System with Building Information Modelling

Introduction:

Building Information Modelling (BIM) technology has rapidly emerged in recent years in the construction industry to reduce construction and design efforts/resources for building design and MEP engineering works. Facility Management (FM) system integration with BIM and Building Management System (BMS) is proposed to be implemented to improve the efficiency of the maintenance of the building. Facility optimization is the keyword in this converging movement towards a more integrated, unified and interoperable building and facility management environment that is poised to further evolve in the direction for smart buildings. The seminar will introduce to the single environment for building owners and facility managers to get actionable data. The single environment can manage, control and optimize pretty much all building functions and facility optimization areas.

Talk sequence

Part 1 : Integrated Building Management System

Part 2 : Facility Management System with Building Information Modelling

Speaker	Ir YH Li 李潤鴻工程師, MHKIE (Electrical), CEng MIET, MIEAust (ITEE colleges)
Target	Practitioners in the engineering & construction industries.
Medium of instruction	The seminar will be conducted in Cantonese with materials in English/Chinese
Date / Time	7 July 2020 (Tuesday) 7:00pm- 10:00pm (3 hours)
Venue	SRDI 社會資源拓展學院 Rm 225/230 Houston Centre, 63 Mody Road, TST East, H.K.

Enrollment

- AsTd Society / AsTdClub Member—**FREE OF CHARGE**
- Others—HK\$300

Name (Full) _____ 姓名 _____

Tel _____ Email _____ Company _____

Payment Method:

1. By Cheque: Payable to "Social Resources Development Institute"
2. Bank Transfer: HSBC 817-850068-001 SRDC LIMITED T/A, SRDI
For confirmation, please email the payment slip to office@srdi.hk
